**Data-driven • Objective • Expert • Trusted**

# Pension service organizations are experiencing significant changes.

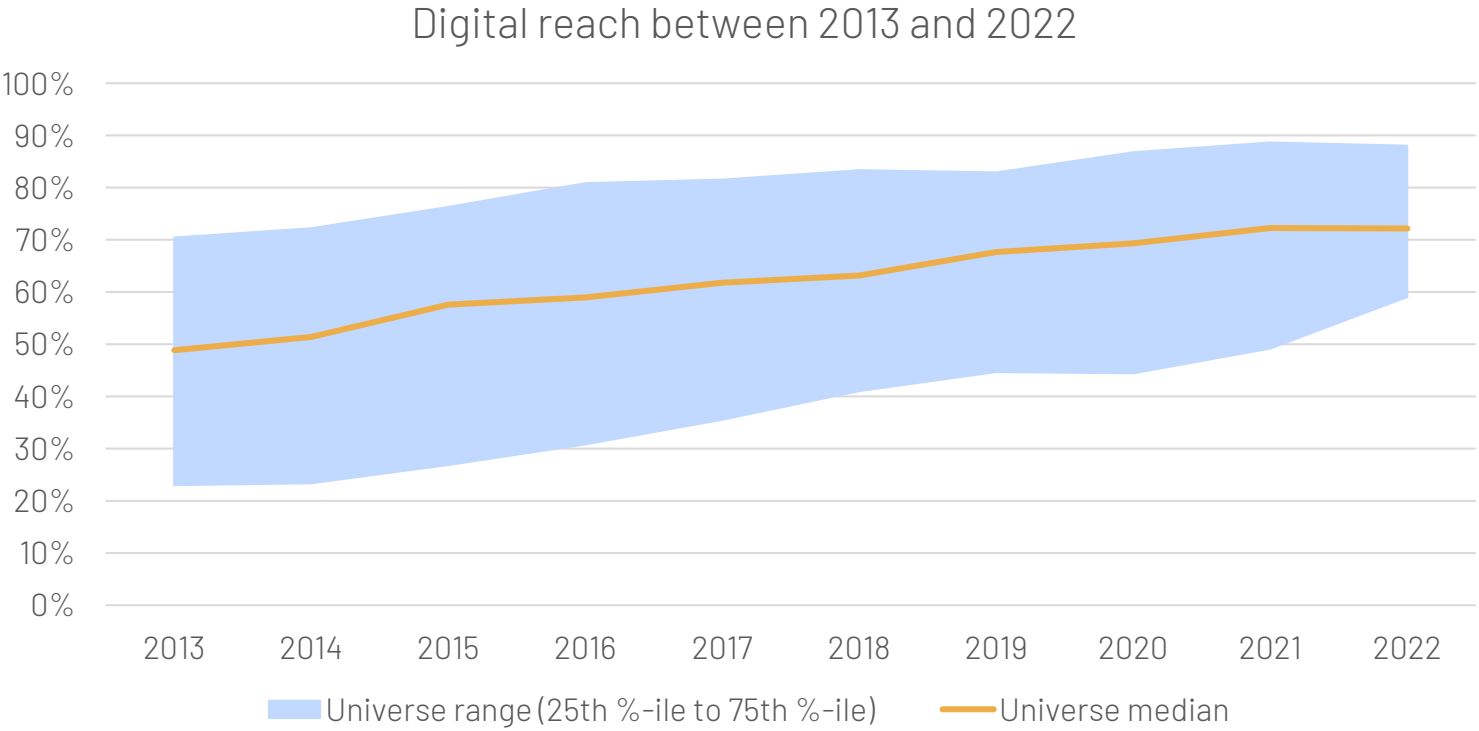

## Digitalization

- Members have higher expectations based on their interactions with companies in other industries.
- Upgrading or replacing legacy systems is impacting the costs for most organizations.
- As digitalization increases, there is a growing concern about cybersecurity and data quality...
- ... and there are opportunities with robotic automation and AI.

## Post-pandemic impacts

- More transactions are happening on secure websites.
- Organizations are adjusting to remote or hybrid work models.
- Employee recruitment and retention issues are disrupting pension operations.
- There has been a substantial decrease in call service levels.

# Average digital reach has increased by 20%.

\* Based on 30 of pension organizations with 10 consecutive years of data.

**Digital reach** is a measure of digital adoption. It is the proportion of your self-service volumes as a % of total incoming volumes.

e.g.:

Total secure website visits (A)	400,000
Incoming calls (B)	70,000
Incoming emails/messages (C)	9,000
Incoming letters (D)	20,000
<b>Digital reach [A / (A + B + C + D)]</b>	<b>80%</b>

# Secure website visits have doubled.

Transaction volumes per 1,000 active members and annuitants between 2013 and 2022

\* Based on 30 of pension organizations with 10 consecutive years of data.

## Changes in transaction volumes between 2013 and 2022:

- Secure website visits, +99%
- Incoming calls, -14%
- Incoming emails, +4%
- Incoming letters, -48%
- Counseling sessions, -26%
- Written estimates, -14%
- Online estimates, +50%

# The nature of member calls has changed for most pension organizations.

Incoming calls per 1,000 active members and annuitants

Call wait time, in seconds

Time on call, in seconds

Percentage of undesired call outcomes

\* Based on 30 of pension organizations with 10 consecutive years of data.

# The Pension Administration Benchmarking Subscription helps organizations understand their performance relative to their peers.

## 1 Customized reporting for your stakeholders

- Detailed cost and service comparisons versus relevant peers
- Presentation to the Board, management teams and/or other stakeholders

## 2 Access to the community

- Annual CEM Global Conference, workshops, and community webinars
- Peer Intelligence Network: an online forum for CEM participants

## 3 Proprietary research

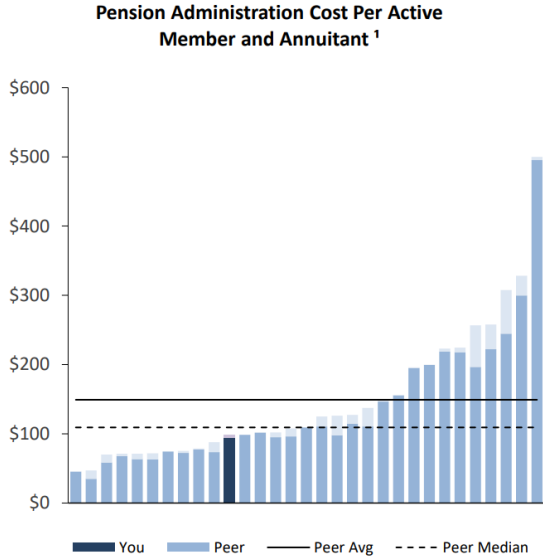

- Original CEM research
- Webinars on topical pension administration issues

# The reporting provides detailed comparisons across key areas.

# The analysis provides an answer to the question: "Do your members get value for their money?"

Your total pension administration cost of \$100 per active member and annuitant was \$49 below the peer average of \$149.

Category	You	Peer
Business-As-Usual Costs	30,000	30,000
Major Project Costs <sup>1</sup>	20,000	20,000
<b>Total Pension Administration</b>	<b>31,875</b>	<b>149,000</b>

We include costs that are directly related to pension administration (e.g., staff costs or an third-party cost attributions of governance, financial control, IT, but utilities, HR, support services and other costs.

The costs associated with investment operations and investment management are specifically excluded.

1. Major project costs are denoted by the lighter shading on the bars. These one-off costs correspond to administration projects only.

Your total service score was 86. This was above the peer median of 75.

CEM believes the best measure for value for money is member service, or the service score.

Service is defined from a member's perspective. Higher service means more channels, faster turnaround times, more availability, more choice, better content and higher quality.

Higher service is not necessarily cost-effective. For example, the ability to answer the telephone 24 hours a day is higher service, but not cost effective.

Your total service score is the weighted average of the service scores for each of the four member journeys

Service Scores by Journey			
Journey	Weight	You	Peer Median
Active member experience	30%	84	73
Inactive member experience	5%	82	75
Retiring experience	35%	84	76
Annuitant experience	30%	92	76
<b>Total service score</b>	<b>100%</b>	<b>86</b>	<b>75</b>

1. The service score methodology was updated this year. Based on last year's service model, your service score would have been 84, which was above the all median of 77.

# Organizations cite CEM results in their public disclosures.

### CEM Benchmarking

Ontario Teachers' service is also measured against leading pension plans in a global benchmarking assessment, conducted by CEM Benchmarking Inc., an independent research company that ranks plan performance in various categories.

In 2019 (the latest year where results were available), Ontario Teachers' had an exceptional service score of 93/100, compared to a Canadian average of 76/100 and a peer group average of 81/100. We are proud to have been ranked first or second internationally for the past 10 years and to have achieved a service score among the top five in the CEM universe for 20 consecutive years.

	2019	2018
Ontario Teachers' Pension Plan	93	94
Global participants average	77	77
Peer group average	81	82
Canadian participants average	76	77

Note: 2019 is the latest year where results are available. Scores are based on fiscal year data using current survey weights. They may not match the results from prior years.

### USS 2020 Cost base vs a Combined CEM Peer Group

● Investments ● Pensions

We compare very favourably with peers, with our overall cost base being £83m p.a. (24%) lower than the combined peer benchmark.

The above analysis was derived from separate investment management and pension administration reports (compiled by the major pension sector benchmarking company CEM Benchmarking) as explained in more detail later in this report.
